Part 1 Due by: October 18, 2010 @ 11:59pm

Part 2 Due by: October 25, 2010 @ 11:59pm

Mini-Project 2 (Part1): Photoshop Layout Mockup

Description

In this two part mini-project you will create a Photoshop layout mockup of a website and then cut it apart and build a HTML and CSS website that utilizes background images.

Requirements

Your project must contain at least two pages, one of which should be a homepage. The background, layout, and menu system should be consistent from page to page.

The Set Up

Instead of screenshots and written directions, we have put together a video tutorial for Part 1 (links below). Feel free to customize your website by changing colors, adding custom content, or even changing the layout; however your final deliverable should be at least as challenging at the layout we present to you.
