Part 1 Due by: October 18, 2010 @ 11:59pm

Part 2 Due by: October 25, 2010 @ 11:59pm

Mini-Project 2 (Part 2): Mockup to HTML and CSS

Description

In this two part mini-project you will create a Photoshop layout mockup of a website and then cut it apart and build a HTML and CSS website that utilizes background images. Part 1 consists of creating the Photoshop mockup while Part 2 requires you to turn that mockup into a fully functional HTML and CSS website.

Requirements

For Part 2, you must build your Photoshop mockup from Part 1 in HTML and CSS. You should create two pages that have a consistent layout but slightly dissimilar content – ie a homepage and a contact page.

The Set Up

You should have a completed Photoshop mockup after completing Part 1. We have uploaded a HTML template file to get you started but for the most part you are on your own for this assignment.

Submission

Upload your completed website via FTP to http://users.decal.aw-industries.com/cs198_xx/mp2/. Submit a .rtf or .txt file containing your link to <http://fa10.decal.aw-industries.com> under MP2 Part 2.
