Basic to Advanced Techniques

# Fall 2010

<http://decal.aw-industries.com>

**FP: Topic due by:** November 22, 2010 @ 11:59PM

**FP: Layout due by:** December 6, 2010 @ 11:59PM

**FP: Website due by:** December 13, 2010 @ 11:59PM

## Final Project

### Description

Almost done! By the last deadline you should have a fully functioning website that meets the requirements below. In the meantime there are two checkpoints, which are spaced generously, for the project. That does not mean that you should spend an entire week writing up your topic and forget about the layout and implementation. Stay well ahead of the checkpoints and you'll turn in an excellent project.

### Requirements

- Be styled with CSS
- Have at least 3 distinct pages
- Have a consistent navigation system
- Have a consistent appearance from page to page
- Use JavaScript at least once
- Have at least one functional and purposeful form element
- Interface with a PHP backend to simulate some functionality

### Included Files

- instructions.pdf

### Topic Submission

By *November 22, 2010 @ 11:59PM*, have submitted a .txt file containing the name of your partner, your project topic and one paragraph explanation, and a sentence or two describing the PHP functionality.

### Layout Submission

By *December 6, 2010 @ 11:59PM*, have submitted a .zip files containing a .psd of layout of your website. You should leave your layers intact and not merge them. If the file exceeds 5MBs please upload the file via FTP to the server and upload a .txt file explaining that you did this to the website.

### Website Submission

By *December 13, 2010 @ 11:59PM*, have submitted a .zip file containing all the files that make up your website (.css, .js, .html, images...). Also submit a .txt file containing a link to your website, which should be located at <http://users.decal.aw->
